

Features & Benefits

The Edge Lit LED ½ Round accepts clear face material. The opening is .500" +/- .038". The Edge Lit has provisions for Spring Pins that will hold the face material in place above the LEDs preventing the weight of the face material from damaging the LEDs. The Edge Lit is commonly used for desktop applications, hanging from ceilings and mounted to walls.

Answers to FAQ's

- Spring Pin spacing - Every 12" on center.
- Check with your Led provider to get the space distance from the LED to the bottom of the face material.
- LEDs and face materials are not included.
